POLL 2: -

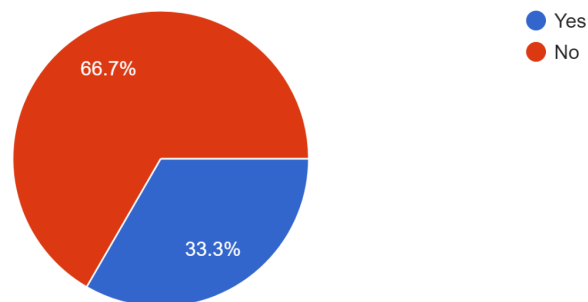

Q: How many of us here have completed the 30 days coding challenge?

You can inform the users that a poll link will be available in the description part of the video.

Please select question 2 from the link to answer the poll. **PLEASE CLOSE THE SESSION**

Have you taken part in the 30 days coding challenge?

6 responses

Importance of attending the 30days challenge:

- Helps you build your network on LinkedIn & get offline job opportunities
- Drives consistency and helps you gain a better understanding of the tech stack that you are learning
- You get to see your day-to-day progress

CTA:

1. Consistency, hard work & patience will help you achieve your dream goal/job
2. Practice immediately after your online classes will help you understand the concepts better
3. 30 days coding challenge will help you build your network and also get access to potential employers who might be looking for hiring new talent
4. Mock interview practice to help you get better at your main interview
5. Figure out on your own by researching on the internet for you to find better results

THANK YOU NOTE:

Thank users for joining the session and if you find the session helpful please share learning on LinkedIn by tagging me & NxtWave and use the #MentorMantra on the post. You can get connected with me by using the link that is available in the description part of the video.
