SoCult frontend internship

About Us

SoCult is the world's first community-driven social media platform with a gamified learning aspect. Users can spend time on the platform to meet like-minded people, discuss various topics, and upload content. The value of the content will be measured in S-coins, which are earned by users.

Skill Set

We are looking for a hustler, stellar problem solver, and remarkable team player who combines the art of design with the simplicity of programming. And we believe that you have it in you. But what differentiates you is if you have a fine eye for detail for how communities interact socially both online and offline.

Kindy make the assignment by using below mentioned languages/libraries:

1. HTML
2. CSS
3. Reactjs/Nextjs
4. Typescript

Hiring Process

Round 1 of hiring will be a telephonic interview, Round 2 will consist of a frontend coding assignment. And the final round will be a video conference call.
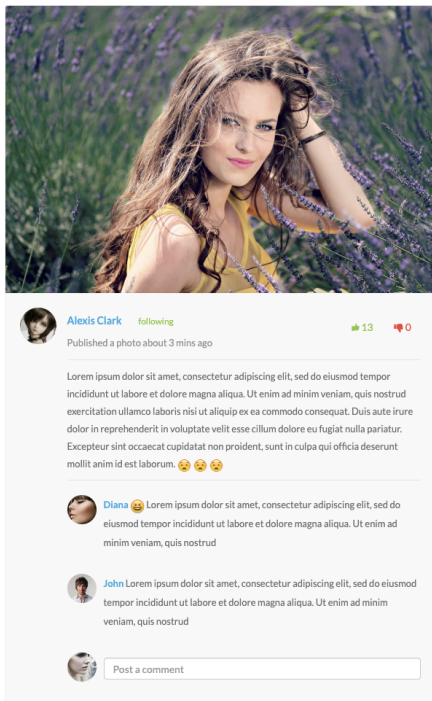

Coding assignment
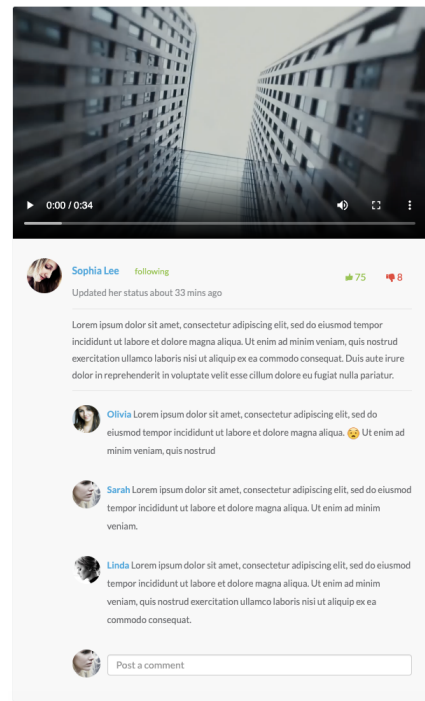

Assignment problem statement

You are required to create a simple social media feed page with the following features:

● The page should serve as the web home page for news feed.

● The home page should display basic user information and two post feeds, each with options to like, dislike, and comment. The center of the page should contain two post feeds: one for photo posts and the other for video posts. It is frontend assignment so will just need to increase the likes count and post comment(No need to save it in database). Please refer to pictures 1, 2 and 5 for reference.

● The left side of the feed page should display basic user details such as bio/description, location, and workplace/college. Please refer to picture 3 for reference.

● The right side of the feed page should list people that can be added to your friend list. Please refer to picture 4 for reference. All friend suggestions should be clickable, and clicking on "Add Friend" should change the text to "Added". Clicking on the person's name should take the user to their profile page. Other people's profiles should include a cover photo, profile photo, name, a single post in the center, and a brief bio on the left. Please refer to picture 3, and picture 5 for reference.

● The webpage should be responsive (mobile friendly)
